

# Apollo S Quick Guide

## 1. Setup & Installation

- Unpack and verify all components.
- Extend the tripod legs and ensure stability.
- Extend the mast to the desired height (4' to 20').
- Insert a fully charged battery.
- Adjust brightness levels for optimal lighting.

## 2. Best Practices

- Position lights 15-20 feet from courts for best coverage.
- Secure against high winds for stability.
- Keep a spare battery for continuous operation.

## 3. Maintenance & Troubleshooting

- Clean lenses regularly for maximum brightness.
- Check mast locks and joints periodically.
- Store batteries in a dry, cool place.
- Troubleshoot issues by checking battery charge and connections.
