- Includes Cable Grommets and Wall Mounting Hardware
- Optional Pole Mounting Kit Available

## Description

---

The **Altelix TBP12** Weatherproof Phone Enclosure is ideal for deploying service and emergency telephones in outdoor locations and harsh environments such as in schools, on pool decks, golf courses, loading docks, public buildings and commercial properties.

This durable NEMA 4X enclosure is molded out of UV resistant PC+ABS, a high tech blend of polycarbonate and ABS which combines the best qualities of both into a single material. PC+ABS enclosures maintain high toughness, durability, and dimensional stability even at extreme cold and hot temperatures. The door is gasketed for use in dusty or wet areas.

Inside features an aluminum mounting plate with a standard RJ11 telephone wall mount jack. The extra deep door of this enclosure can accommodate telephones up to 5.5 inches in height. A cable grommet is provided on the bottom of the enclosure for the telephone wire.

### Mounting

Integrated mounting feet simplify installation. For enhanced security, this enclosure can also be mounted using internal mounting points (drilling required) and included hardware. An optional pole mount kit is also available.

### Labels

The TBP12 is available with either a red and white Emergency Phone label or a green and white Service Phone label. Applied to the enclosure door, these labels are weatherproof and UV resistant.
