CABLING & COMMUNICATION SOLUTIONS

10 Watt Portable High Powered Rechargeable LED Safety Work Light

Applications

- Cable Installation
- Construction
- Camping
- Attics & Crawl Spaces
- Household Projects
- Emergency Lighting

Compliances

- RoHS Compliant
- CE

Features

- Low Voltage 10 Watt, High Power, Cool White Surface Mounted LED That Stays Cool and is Burn Free
- 120 Degree Beam Pattern
- Explosion Proof
- Built-In Rechargeable Lithium Ion Battery
- Magnetic Base Feet
- 100-240 VAC Charger and a 12V Car Charger Included With Light

Overview

Our Rechargeable LED Safety Work Light utilizes a 10 Watt, High Power, Cool White surface mounted LED. This light generates up to 900 lumens with a wide 120 degree beam pattern. The built-in rechargeable Lithium ion battery keeps any construction site, crawl space, or related area illuminated up to 3 hours and completely recharges in 5 hours. The durable steel tube stand adjusts to an array of accommodating angles to give light where needed. Opposed to a Halogen Work Light that gets too hot and is vulnerable to harsh environments, our safety light runs cool, is durable, rechargeable and is designed with magnetic base feet for deployment alongside any truck or vehicle, in shipping containers or anywhere where it can be attached to metal. Most importantly, it can be placed and operated anywhere with no extension cord or outlet needed.

Specifications

LED	***10 Watt***
Max Output	***900 Lumens***
Switch	***Weatherproof Aluminum Housing Switch with Charging Indicator***
Weight	***2.9 lbs***
Battery	***7.4 V Rechargeable Lithium Ion 4.4 Ah***
Battery Run Time	***3 Hours***
Charge Time	***5 Hours***
Item #	***SLDWL-04591***
