CC Wire Terminal

Antenna Adapter

How To Use Your New Adapter:

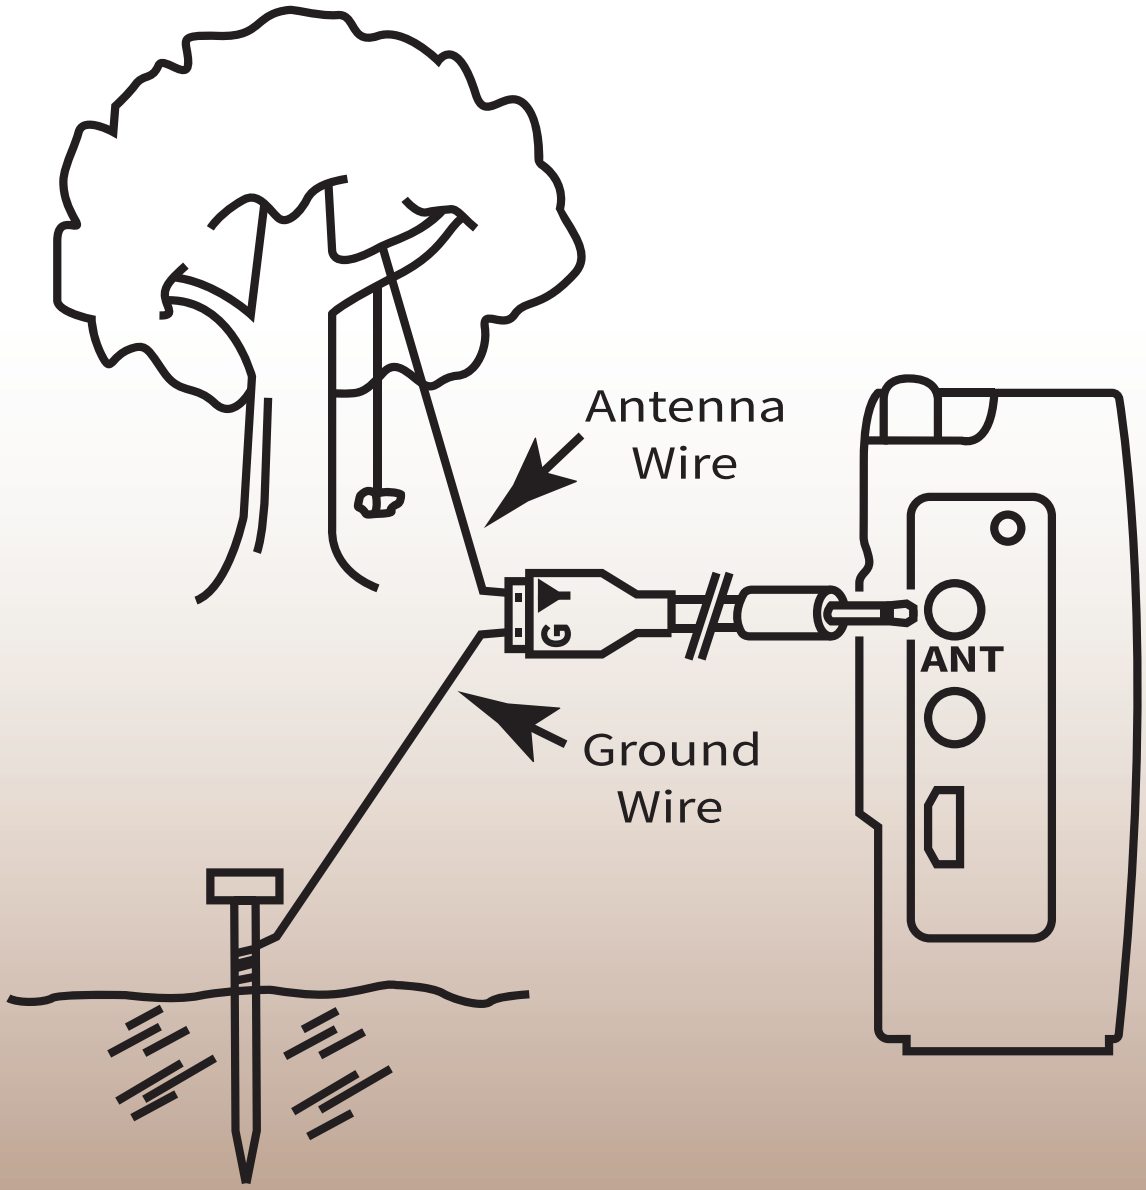
1. Loosen both wire terminal screws.
2. Insert a long wire (65 -100’ recommended) into the Antenna terminal screw and tighten.
3. Repeat this process for the ground wire or other side of a dipole antenna.
4. Plug in the 1/8” mono plug into the “ANT” jack of your radio.

WARNING: Installation should be done safely or by a professional. Disconnect when not in use and if lightning is predicted. This can be used with a long wire with ground or a dipole antenna.

CC Wire Terminal

Antenna Adapter

One of many ways this can be done...



TIP: More information can be found by searching “simple shortwave antennas”.
